Note:

1. Ensure TMV1 check valves are removed. (This will be diverter valve.)
2. Set TMV1 20°F below Rinnai temperature setting.
3. TMV2 should be set to desired domestic temperature.
4. For lowest activation flow rate, ensure water heaters are connected with appropriate cascade controls.

This is not an engineering drawing; it is intended only as a guide and not as a replacement for professional engineering project drawings. This drawing is not intended to describe a complete system. It is up to the contractor or engineer to determine the necessary components and configuration of the particular system to be installed. The drawing does not imply compliance with local building codes. It is the responsibility of the engineer or contractor to ensure that the installation is in accordance with all local building codes. Confer with local building officials before installation.
